Microsoft[®]

Microsoft[®]

Test drive the best productivity experience across PC, Phone & Browser

By being immersed in the Microsoft technologies, you will learn how to leverage a unified infrastructure with already familiar products to realise organisational efficiencies, improve communication and collaboration, gain business insight, find information more quickly, and empower your teams in a changing workplace.

Unified Communications
Streamlined communications with amplified protection and control

Collaboration
Connect people and expertise anywhere, anytime

Enterprise Content Management
Make the tools support the business

Enterprise Search
Get better answers, faster and connect with the people and expertise you need

Business Intelligence
Have the right information at the right time to drive decision making

What is the Customer Immersion Experience?

The Microsoft Customer Immersion Experience (CIE) provides a facilitated hands-on environment where business and IT decision makers test drive Microsoft technologies including Office 365, Office, Exchange, SharePoint, Lync, Project, Visio, Windows, Windows Phone, Dynamics CRM and System Center.

*“What I hear I forget, what I see I remember:
what I do I understand”
Confucius*

Why should you come to a CIE?

Unlike traditional product presentations and demos, the CIE puts you in the driver's seat for a rich, interactive experience. It is a unique opportunity to explore Microsoft's Office applications by role playing in a "true-to-life" environment. Discover the right solutions for your business and experience the "future of productivity".

**Engage in open, creative dialogue
with colleagues and subject matter experts
to discover what's possible for your business.**
