Hosting and Data Centre Solution of the Year

entrada Infrastructure as a Service

Scalable Virtual Private Server (VPS) resources enabling greater flexibility and performance while reducing infrastructure costs.

SOFT SOURCE
COMPUTING A BETTER WAY

entrada IaaS

Hosted ICT environment that enables the deployment of highly available, cost effective and agile server resources.

- Flexible
- Scalable
- Secure
- Economical
- Leading Edge

Do these challenges sound familiar?

Need more server resources but don't have the budget?

Have fluctuating requirements and don't want to invest in maximum resources when only required for short periods of time?

Need server resources immediately and don't want to wait days or even weeks for a new server to be built?

Need to reduce your infrastructure costs?

Need high availability?

Data centre out of capacity?

Need to provide mobility to your workforce?

entrada Infrastructure as a Service is your solution

Have your VPS managed by us in our secure, state-of-the-art data centre, or you can dynamically provision and manage your virtual server within minutes.

Our dynamic servers enable you to tailor your resources at the click of a button any time day or night and be operational immediately. You retain full control of your virtual server with the ability to start or stop it and scale up or down at any time. It really is that simple!

VPS Benefits Include:

- Reduced costs
- Pay As You Grow - Start from just \$136 per month
- Increased reliability
- No capital expenditure
- Complete self-management of dynamic virtual servers
- Rapid Scalability - Increase or decrease capacity at any time
- Fast Provisioning - Cloud Servers can be created and running in under 30 minutes
- 24/7 Access - Full & immediate access, any location, any time
- 99.9% uptime SLA guarantee and peace of mind
- Reduced carbon footprint

Controlling infrastructure
Less cost
Outsourced hardware
Utility Computing
Dynamic scaling

The entrada Data Centre:

The entrada Data Centre provides a cost-effective, highly reliable hosting platform for your mission critical services and applications.

This Tier Three facility is built on end-to-end HP Converged Infrastructure and the latest 3PAR technology offering exceptional performance, the latest in security with strong green credentials. The entrada facility offers carrier neutral, 24/7, state-of-the-art Data Centre services enabling clients to enjoy reduced operational costs through lower power consumption and simplified systems structure, highly reliable, secure and scalable Virtual Server resources.

This allows businesses to access state-of-the-art resources without the equivalent investment in expenditure, shifting the outlay from CAPEX to OPEX and saving on overheads such as security, power and maintenance.

Ph 09 918 3712 sales@softsource.co.nz

"We required more diversity and scalability than what our conventional servers offered and the Softsource entrada VPS offering suited us perfectly. The personal contact/relationship that Softsource brings to the service was a bonus along with their ability to perform on a tight timeline and provide rapid responsiveness."

*Richard Coomber, Infrastructure Manager
e-merge Data Solutions*

"Using Laserfiche over the cloud is a seamless experience. We can upload documents via FTP or via the desktop, we can connect to repository and have it act pretty much like we're running locally."

As for your service, it was almost too easy to configure and manage. Your support staff were very helpful and responsive. All in all, a very good experience and I look forward to rolling out more sites in the future."

*Brian Kotch, Business Solutions Specialist
Ricoh New Zealand Limited*

"We don't need to commit in advance when planning hardware or software deployment so over-provisioning is a thing of the past."
